

Art & Design Technology Curriculum

Years EYFS to 11

Curriculum Intent:

Art and Design offers unique opportunities to students to develop their creative potential, express their ideas and develop their imagination, whilst investigating and taking inspiration from a wide range of images, objects, artefacts and also from art history. The students' understanding and application of the elements of art and the principles of design provide the building blocks with which to record from observation, memory and imagination. As they become confident and competent with the use of an increasing range of media, techniques, processes, tools and equipment, whilst utilising in-depth specialist art vocabulary, they have the visual and aesthetic language and understanding to both analyse the work of others and bring their own ideas into visual reality. The students develop a range of skills and concepts that can be used throughout life. Our students will become the artists and designers of tomorrow, effectively adapting, changing and creating the world around them into the future.

Year	Curriculum Journey
EYFS	Self-portraits: skin colours, brush strokes and colours Land of Make Believe: describing textures of objects from nature and non-natural materials The Brilliant Bug Ball: looking closely at features of insects and drawing them Growth and Lifecycles: print making and observing patterns and changes Barnaby Bear: making collages and printing patterns
