

Name: Miss. A. Ghedia

Class: 3S

Why Teaching?

When you're teaching, every day is different! You see the most magical moments in children's eyes when they learn something new. I remember a few months ago, during a science lesson, we were learning about plants and we had planted bean plants and tested their growth under different conditions. When I pulled out the bean plant from inside the cupboard, the children gasped to see how tall it had grown given it hadn't been exposed to any light. This was promptly followed by a very interesting discussion about why? and how? It still gives me tingles to this day. It is moments like these that are priceless and hard to find in any other profession.

Advice for My Students:

Try your best and forget the rest!

If I can give children one piece of advice it would be to go to the library and read. Read as many books as you can. There's nothing like being engrossed in a good book and having it take your imagination to another place. It's what I loved to do as a child and there are some fantastic authors, who have written some amazing books out there for you to find.

Favourite Proverb:

Practice makes perfect

Don't give up if you can't do it right the first time, try, try and try again. Remember practice makes perfect.

Person Living or Dead I Would MOST Like to Meet and Why:

I would most like to meet Steve Jobs as I have been reading his biography. I was really intrigued to know what he was like in terms of his personality and his work ethic. People say he was stubborn, but in order to have changed the world by designing new technology, I believe he must have been someone very special.
